%voted_1982_general	% who voted in the 1982 general election
%Dem	% voting Democratic
%Rep	% voting Republican
%Ind	% voting Independent

### Data notes:

1. Because the Census is conducted in two parts, a complete and a sample survey, it is possible to find two numbers, which should logically be the same, but which are slightly different. Also, due to the effects of rounding, percentages may not always add to exactly 100%.
2. No attempt was made to carry the accuracy of reported percentages beyond two decimal places (.01); therefore segments of the population making up less than 0.5% were generally reported as 0%.
3. The percentages for Democrats, Republicans, and Independents were taken from the May 18, 1982 voter registration report. The % who voted and the number of registered voters in 1982 were taken from the post-election November 1982 report.
4. For neighborhoods in the City of Pittsburgh, voting data were reported for wards, which in general are not the same as neighborhoods.
5. Voter information for Pittsburgh SMSA is not available.
6. Party affiliation for Northview Heights is not available.
